QUENEDY PABULAR

Entry-Level Full Stack Developer
Cauayan City, Isabela, Philippines, 3305
0967-623-3104 | quenedypabular12@gmail.com
https://quenedypabular.vercel.app | https://github.com/QuenDev

SUMMARY

Entry-level full stack developer specializing in Next.js, TypeScript, Express, and Supabase. Built real-world applications including an AI-powered resume analysis SaaS integrating LLaMA-based models via Groq API and an RFID-based network system deployed at Isabela State University. Focused on building scalable, user-centered web applications and improving backend and API development skills.

EDUCATION

ISABELA STATE UNIVERSITY- CAUAYAN CAMPUS Cauayan City, Isabela
Bachelor of Science in Information Technology July 2025
Specialization Track: Web and Mobile Application Development

WORK EXPERIENCE

ISABELA STATE UNIVERSITY- CAUAYAN CAMPUS Cauayan City, Isabela
(Management Information Systems Intern) Feb 2025 – May 2025

- Assisted with hardware setup, troubleshooting, and IT system support for campus operations.
- Prepared technical documentation and reports for system maintenance and infrastructure.
- Developed and supported a web-based RFID student voucher network access system.
- Delivered a production-ready system with 1,000+ student records; deployed for institutional use.

PROJECTS

AI Career Launchpad — AI Resume Analysis SaaS
Next.js, Express.js, Supabase, Groq API, Tailwind CSS
Live Demo: https://ai-career-launchpad.vercel.app | **GitHub:** https://github.com/QuenDev/ai-career-launchpad

- Built a full-stack AI-powered platform analyzing resumes using LLaMA-based models via Groq API.
- Implemented ATS-style scoring and keyword gap analysis to evaluate match quality.
- Structured LLM outputs into actionable insights and integrated secure JWT-based workflows.
- Designed RESTful API endpoints and implemented PDF parsing with structured prompt generation for consistent AI output.

RFID-Based Student Voucher Network Access System
HTML, CSS, JavaScript, PHP, MySQL, RFID

- Delivered a production-ready system with 1,000+ student records deployed at ISU-Cauayan.
- Implemented real-time RFID verification for voucher access and monitoring.
- Built an administrative dashboard for record management and system tracking.

QR Code Attendance & DTR Management System
Electron.js, Node.js, JavaScript

- Built an offline-first desktop app supporting up to 50 employees with zero data loss.
- Developed QR-based attendance tracking with automated work-hour calculations.

Animal Corner – Pet Profiling & Veterinary Appointment Mobile App (Capstone)
Flutter, Dart, Firebase

- Submitted to Google Play Store and passed review prior to removal due to project constraints
- Built multi-user Flutter app with Firebase Authentication supporting concurrent pet owner and veterinary clinic accounts.

SKILLS

Languages: JavaScript, TypeScript
Frontend: Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js
Databases: Supabase (PostgreSQL), MySQL, Firebase
Technologies: REST APIs, JWT Authentication, OAuth, Middleware, CORS, Rate Limiting, Input Validation
Tools: Git, GitHub, VS Code, Vercel, Render
